

Company Profile

At Enova Africa, we believe in transcending boundaries, both in design and impact. Our vision extends beyond creating spaces, we are architects of sustainable legacies.

With innovation at our core and sustainability in our ethos, we are reshaping the future.

Aisha Abu Aminu
CEO/Founder

Overview:

Enova Africa Limited is a pioneering Afrocentric company at the forefront of sustainable development in the architectural, real estate, construction, investment, and green consultancy sectors.

With a commitment to excellence, innovation, and environmental responsibility, Enova Africa strives to shape the future of the African built environment through cutting-edge and eco-friendly solutions

Our Mission:

At Enova Africa, we envision a sustainable future where innovative green practices harmonize with Afrocentric design, creating resilient, vibrant, and inclusive communities. We are dedicated to leading the transformation of Africa's built environment by integrating sustainability, creativity, and excellence into every project.

Core Services:

1. **Green Architecture:** Enova Africa specializes in Afrocentric green architecture, blending traditional design elements with state-of-the-art sustainable technologies. Our architectural solutions prioritize energy efficiency and harmonious integration with the local environment.
2. **Real Estate Development:** We are committed to developing eco-friendly, community focused real estate projects that enhance the quality of life for residents. Our developments prioritize green spaces, renewable energy sources, and sustainable building practices.
3. **Construction Services:** Enova Africa ensures the construction of high-quality, sustainable structures. Our construction practices adhere to international standards, emphasizing resource efficiency, waste reduction, and safety.
4. **Investment Solutions:** We provide investment opportunities that align with sustainable development goals. Enova Africa identifies and supports projects that contribute to environmental conservation, social well-being, and economic growth.
5. **Renewable Energy Integration:** Enova Africa is a leader in incorporating renewable energy solutions into our projects. We specialize in solar, biogas, and other sustainable energy sources, ensuring that our developments contribute to a cleaner, more resilient energy future.
6. **Green Consultancy:** Our expert green consultancy services offer tailored solutions to individuals, businesses, and organizations seeking to adopt sustainable practices. From energy audits to environmental impact assessments, Enova Africa guides clients toward a greener and more efficient future.

Sustainability Certifications:

Enova Africa is dedicated to meeting and exceeding international sustainability standards. We actively pursue certifications such as LEED (Leadership in Energy and Environmental Design) and EDGE (Excellence in Design for Greater Efficiencies) to ensure our projects align with the highest global benchmarks in green building practices.

Key Differentiators:

1. **Afrocentric Design:** Enova Africa celebrates the rich cultural heritage of Africa by integrating traditional design elements into modern, sustainable architecture.
2. **Innovation and Technology:** We leverage cutting-edge technologies and innovative solutions to create smart, efficient, and environmentally conscious designs.
3. **Community-Centric Approach:** Our projects prioritize community well-being, inclusivity, and social impact, fostering a sense of belonging and pride among residents.
4. **Environmental Stewardship:** Enova Africa is dedicated to minimizing its ecological footprint. Our projects prioritize renewable energy, water efficiency, and biodiversity conservation.
5. **Collaboration and Partnerships:** We foster collaborations with local and international partners, creating a network of experts, suppliers, and stakeholders who share our vision for sustainable development.

At Enova Africa, we believe in building a sustainable legacy for future generations. Join us on the journey to create a greener, more resilient Africa.

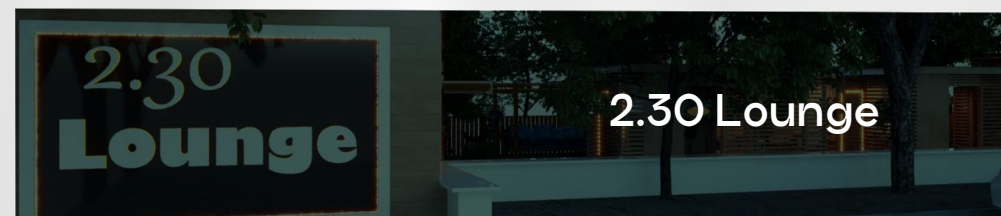

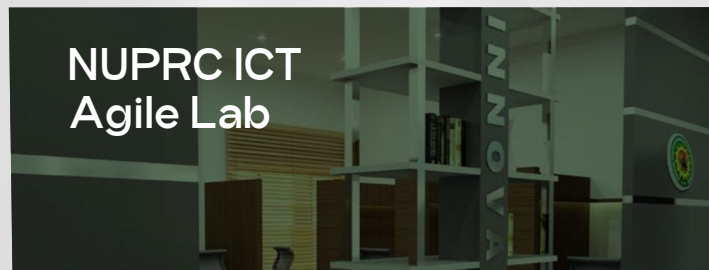

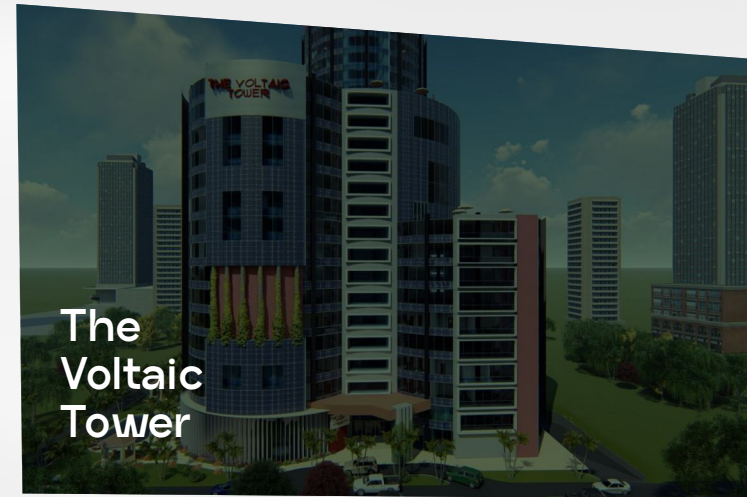

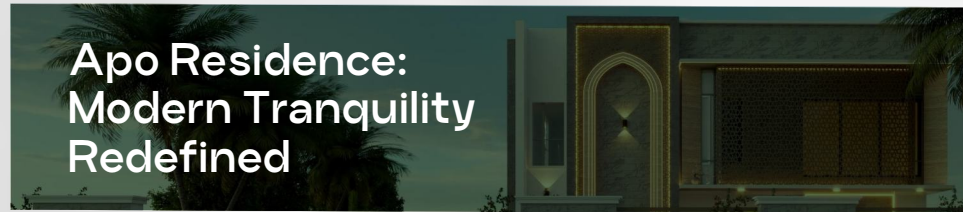

Meet our CEO

Aisha Abu Aminu, the CEO and Founder of Enova Africa, is a visionary leader deeply committed to sustainable development. With both a BSc and an MSc in Architecture from Ahmadu Bello University, she earned distinction as the best overall student for five consecutive years during her MSc program. Her commitment to sustainability is exemplified by her certifications as a LEED Green Associate and an EDGE Expert, showcasing her comprehensive grasp of sustainable principles and her ability to effectively implement eco conscious design strategies. In her continuous pursuit of knowledge and expertise in sustainable design, Aisha has actively engaged in professional development. She completed the Building Expertise on Developing Sustainable and Resilient Infrastructure course from École Polytechnique Fédérale de Lausanne Switzerland (EPFL), the Net Zero Energy Design course from TUDelft Netherlands, and the Unlocking Investment and Finance in Emerging Markets and Developing Economies program offered by the World Bank. These programs have equipped her with critical insights into financing sustainable projects and developing resilient infrastructure.

Aisha's technical skills are noteworthy, with certifications in Python from the University of Michigan, USA, and specialized data science applications specific to architecture, construction, and engineering from the National University of Singapore. Complementing her technical prowess, she holds a certification from the Chartered Institute of Project Management (CIPM), which enhances her project management and leadership abilities.

Aisha's contributions to Enova Africa are invaluable, as she plays a pivotal role in pioneering the integration of green real estate, sustainable energy, and strategic investments, driving toward a more environmentally conscious future. Aisha has a remarkable track record of successful collaborations with international firms in Turkey, Italy, Germany and the UAE, further showcasing her prowess in executing and delivering impactful projects on a global scale.

Our Projects

The Voltaic Tower

Presenting our The Voltaic Tower – an architectural masterpiece that seamlessly combines aesthetics with cutting edge renewable energy technology. This vertical marvel stands as a testament to our unwavering commitment to sustainable design.

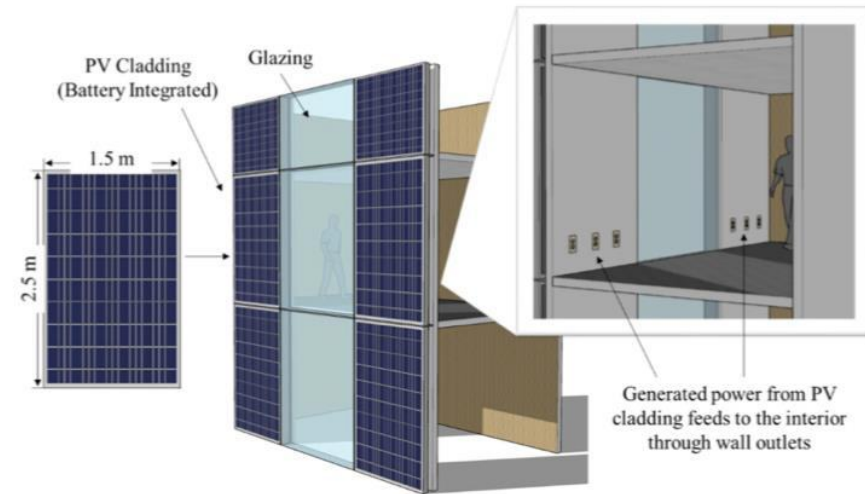

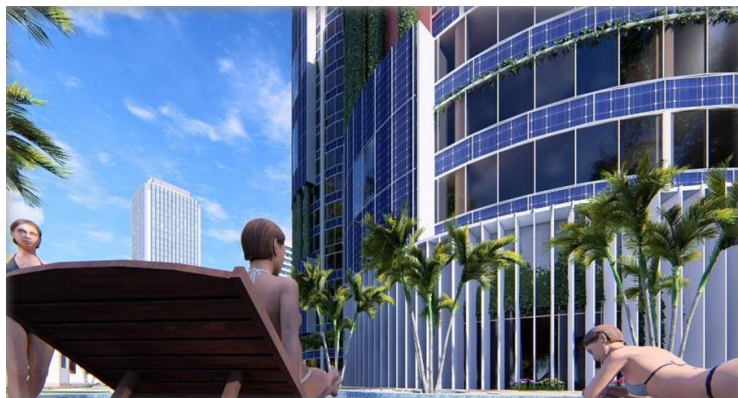

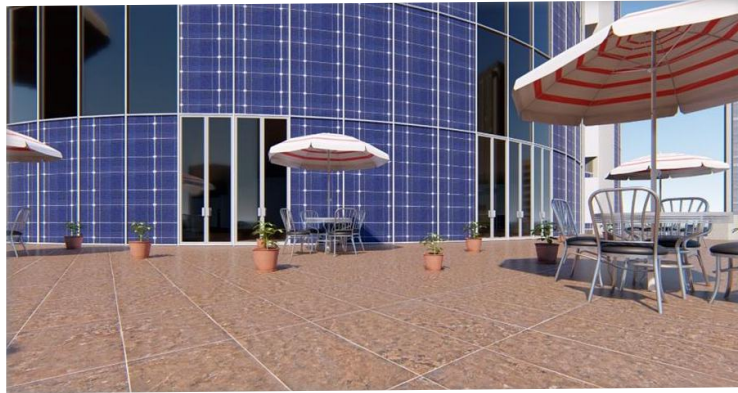

Adorned with integrated solar panels, the Photovoltaic Tower not only adds a distinctive flair to our projects but also generates clean energy, exemplifying our dedication to a greener and more environmentally conscious future. With every innovative detail, we illuminate the path towards sustainable living and responsible architecture.

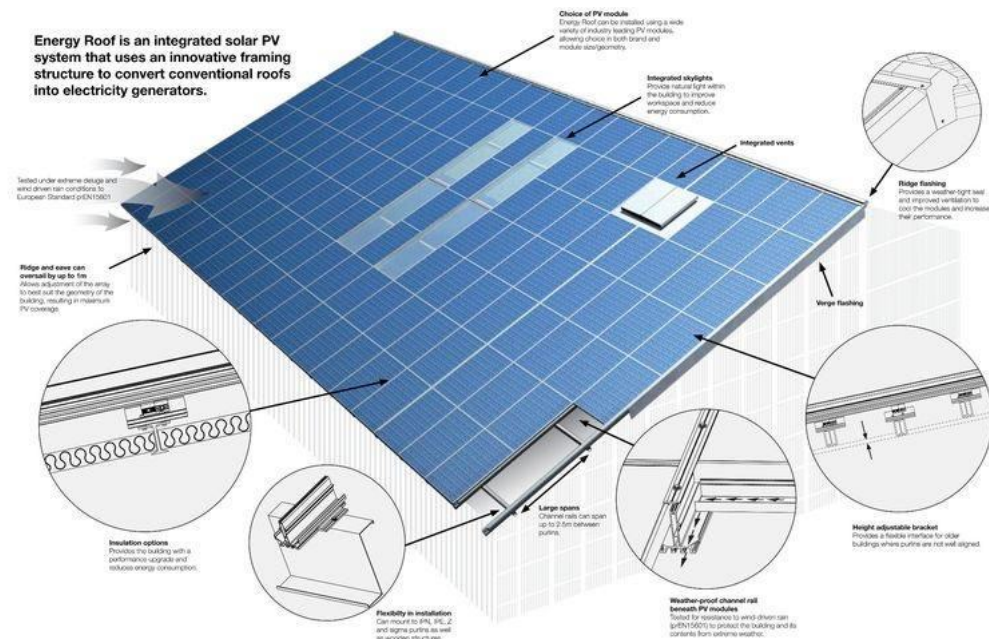

The Voltaic Tower

The Voltaic Tower

Energy Roof is an integrated solar PV system that uses an innovative framing structure to convert conventional roofs into electricity generators.

We introduce a collection of five minimalist residences in the heart of Katampe Extension that embody simplicity, functionality, and eco-conscious living. Our commitment to environmental responsibility is reflected in every aspect of these Residences.

Katampe Extension Terraces

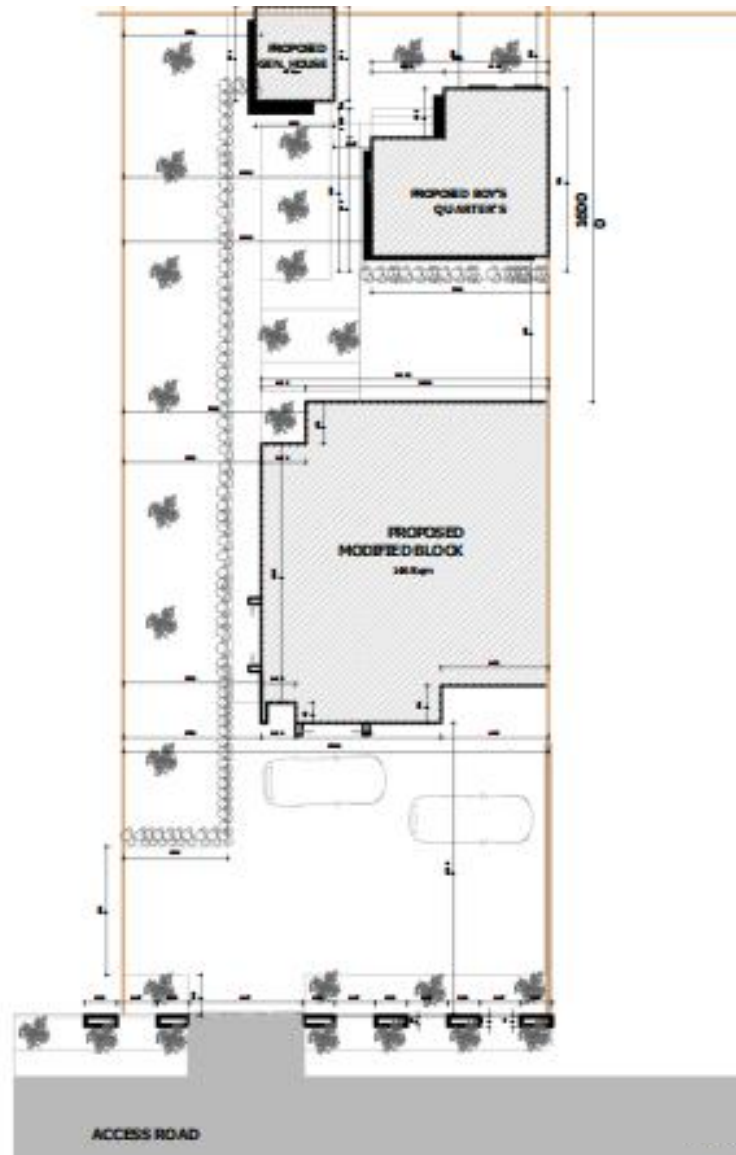

A photograph of the Apo Residence at dusk. The building features a prominent arched entrance with a glowing light fixture inside. To the right, there is a large window with a decorative, patterned screen. The building is surrounded by palm trees and other tropical vegetation. The sky is a mix of blue and orange from the setting or rising sun.

Apo Residence: Modern Tranquility Redefined

Apo Residence, a jewel in the portfolio of Enova Aesthetics, is a singular masterpiece of contemporary elegance. This residence, characterized by clean lines, a pristine white color palette, graceful arches, and intricate patterns, epitomizes modern tranquility.

Every element is meticulously designed to create a harmonious living space that seamlessly blends sophistication with timeless aesthetics. Apo Residence is not just a dwelling, it is an artistic statement, a sanctuary where architectural precision meets a refined sense of beauty, setting a new standard for modern living.

NUPRC ICT Agile Lab

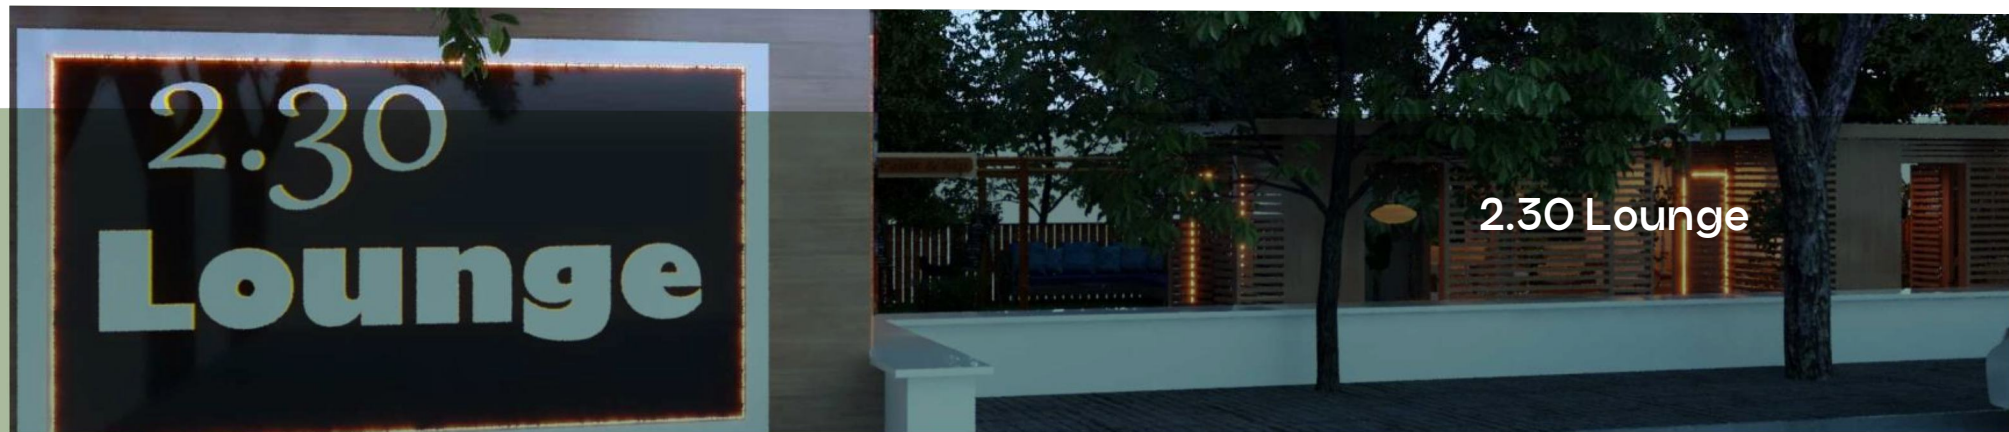

NUPRC ICT Agile Lab, a hub where innovation thrives amidst sustainable design. Our collaborative spaces are tailored for open discussions, brainstorming sessions, and leadership initiatives, creating an environment where ideas flourish and innovation thrives. Embracing a commitment to sustainability, our use of eco-friendly elements includes sustainable wood, non-toxic paint, and therapeutic plants that not only enhance the aesthetics but also contribute to cleaner air and a healthier workspace. The integration of acoustic solutions in walls, floors, and ceilings ensures a tranquil atmosphere, facilitating focused work and improving interior sound quality. Our recreation and lounge spaces provide a respite for rejuvenation, promoting a balanced and engaging work environment. With an emphasis on good lighting, strategic color psychology, ergonomic furniture, and energy-efficient equipment, the NUPRC ICT Agile Lab is not just a workplace but a thoughtfully curated space that enhances efficiency, creativity, and overall well-being for all its occupants.

My Food: Architectural Elegance In Harmony With Nature

My Food stands as a testament to architectural excellence intertwined with sustainability. The innovative use of bamboo for drop lights and partitions not only adds a touch of Afrocentric elegance but also reflects our commitment to ecofriendly design choices. The carefully selected grass carpet brings a natural serenity to the space. MY Food architectural aesthetics go beyond conventional boundaries, creating a dining environment where Afrocentric influences and sustainable design seamlessly converge. Each corner of My Food is a visual delight, harmonizing modern dining with ecoconscious architectural choices, inviting guests into a unique culinary experience set against a backdrop of thoughtful, sustainable design.
